Profile

Hey There!

I'm a young, proactive, and eager frontend developer having 3+ Years of hands-on experience in the frontend world.
Although Frontend Development is my profession but I take it as I was **made** for it.

I have this habit that I look down to each and every pixel and make UX/UI as **pixel-perfect** as possible as per the given design. I can Also make some UX/UI changes when the need arises.

One thing that I brag about or feel proud about myself is that the **speed** in which I deliver the work with 100% best quality keeping best code practices in mind. I write code as a 5 year old will get it (making it simple as possible).

I love it when I run into a bug or a problem because I love to do problem-solving with **best solutions**.

I'm a very **friendly** guy and I usually see my clients as my friends. (Idk how they see it though XD). And I try my level best to satisfy my clients no matter what it takes.

Here are some real-world projects I've worked on:

https://gethired.softsons.com
https://gethired-company.softsons.com
https://gentwo.com
https://case24-alt.vercel.app
https://resumev2.netlify.app
https://botmas.vercel.app/

I'm a fast learner and I pick things up quickly to save as much time as possible

Thank you for reading my resume.

- Best Regards
~ Waleed Ali Khan ~
